

## **PASSWORDS FOR YOUR COMPUTER**

You probably never thought about who has possession of your passwords to get into your computer and your various computer files and websites. It is important that you keep a list of these in a very secure place that somebody can get to after your death. It is important for them to know where it is and how to locate it.

Without this, no one is going to obtain access to your computer. If they do get access to your computer, then they will not be able to get access to your passworded files and websites. No one is going to release that information to your family. It would have to be secured with a court order after your death. This would be a very expensive process.

Taking care of this during your lifetime will be simple and cost free.

**THOSE WHO PLAN AHEAD WIN.  
THOSE WHO DON'T PLAN AHEAD LOSE.**
